Artemis-V Mars Mission Manual

1. Mission Objective

The Artemis-V mission aims to establish the first permanent habitat on the Martian surface by 2038.

2. Habitat Specifications

The primary habitat, known as 'Ares Base', is constructed using 3D-printed regolith composite material. It can withstand external temperatures dropping to -100 degrees Celsius and local sandstorms with winds up to 150 km/h.

3. Key Personnel

- Mission Commander: Captain Sarah Jenkins
- Chief Engineer: Dr. Elias Vance
- Lead Botanist: Dr. Maya Lin

4. Emergency Protocols

In the event of a depressurization alarm, all crew must immediately dawn their Mark-IV suits and proceed to the central airlock bunker. The lockdown override code is 'ARES-LOCK-44'.
